Performance Evaluation Category: SITE ASSESSMENT - 1150 LSD MERCURY			
Description of Contractor Observation By: JOHN SHERRARD - On March 11, 1993, the U.S. EPA tasked the Ecology and Environment, Inc. (E & E) Technical Assistance Team (TAT) to respond to an Emergency Response and assess a small mercury spill at 1150 North Lake Shore Drive, Chicago, Illinois. The TAT prepared and implemented a site health and safety plan, documented PRP contractor oversight, provided mercury vapor monitoring inside an apartment, and provided technical support. On March 12, 1993, the TAT was responsive to the immediate request of the OSC to conduct air monitoring using the Jerome 411 Mercury Vapor Analyzer and to perform contractor oversight of the clean-up of the spill. A site assessment report was submitted to U.S. EPA.
